

Spring 2026 Final Degree Audit

From Shah, Priyal R <pmorjaria3@gatech.edu>

Date Sat 16 May 2026 10:10

Greetings from Atlanta!

This email is to confirm that I have completed your final degree audit for the Spring 2026 semester. Based on your grades from this semester and your cumulative GPA, you have met the degree requirements and have been awarded the Master of Science in Computer Science degree. Congratulations!

It is important that you review your degree audit online at <https://degreeaudit.gatech.edu> and notify me immediately if you feel anything is listed incorrectly.

Please review the following FAQs regarding graduating and completing the OMSCS program:

1. When will I receive my diploma?

Diplomas are printed by an outside company, and it typically takes eight to twelve weeks for diplomas to be printed and mailed.

2. Who do I contact with any questions regarding my diploma?

Please contact the Registrar's Office at diplomas@registrar.gatech.edu.

3. How can I confirm that my degree has been awarded?

You should be able to see your degree posted on your unofficial transcript immediately, as well as on your record in DegreeWorks (though this may be delayed by 1-2 business days, as the system needs time to be refreshed).

4. If I need to prove my graduation before I receive my diploma, how can I do so?

Degree verifications are processed by the Registrar's Office. Please visit <https://registrar.gatech.edu/info/degree-verifications> for more information.

5. Can I continue taking OMSCS courses after I graduate from the program?

It is possible for students to continue taking courses after they have graduated from the OMSCS program by changing their status to "Special/Non-Degree Seeking". Please keep in mind the following regarding the Special/Non-Degree student status:

- You will continue paying OMSCS tuition and fees.
- You will have a later registration time ticket than most degree-seeking students.
- The same rule applies in that if special/non-degree students do not enroll for three consecutive terms (including the summer term), they have to apply for readmission.
- The special/non-degree status will last until you apply for another program at Georgia Tech.

- There is no overall limit on how many courses you can take as a special/non-degree student.
- You would earn credits in the sense that if you wanted to transfer them to another institution, you could. However, at Georgia Tech, the credits would not count for anything.
- Courses taken as a special/non-degree student **will** alter your GPA because the GPA does not start over again with a new class standing. However, for the purposes of your resume, whatever your GPA was when your degree was awarded will be your MS GPA.
- Courses taken as a special/non-degree student will appear on your transcript and become a part of your student record (this is not optional).

6. If I wish to enroll as a Special/Non-Degree student, how and when should I request this status change?

If you would like to enroll as a Special/Non-Degree student in the Summer 2026 semester, please complete and submit the required [webform](#) **immediately**. I will contact you with registration information/instructions once your status has been updated accordingly. As a reminder, Summer 2026 registration ends next Friday, May 22 at 11:59pm ET.

If you would like to enroll as a Special/Non-Degree student in the Fall 2026 semester, please complete and submit the required [webform](#) **by May 29**, as the Fall 2026 Phase I registration period will be taking place in early June.

If you would like to enroll as a Special/Non-Degree student in Spring 2027 or later, please contact our office at oms-advising@cc.gatech.edu at least 3-4 months ahead of your desired start term. As a reminder, readmission would be required if you did not enroll in a course for three or more consecutive semesters.

7. Can I continue being a TA after I graduate from the program?

This is possible, but it is more complicated than taking courses after graduating. You would have to be hired as a part-time instructor. The hiring process takes more time, and you have to consent to a background check. Therefore, you should be absolutely sure that you really want to continue being a TA before you apply.

Please note that international students who are not living in the U.S. most likely cannot be hired as TAs, as the Institute has to be able to verify your identity and conduct a background check, and you have to have a Social Security number to do this. International students who are not living in the U.S. may not work as TAs for free. Unless we hire the TA, there is no way of holding him/her accountable for his/her work as a TA.

8. What technology-related services will I retain as a graduate of Georgia Tech?

Please visit https://gatech.service-now.com/home?id=kb_article_view&sysparm_article=KB0027556 and https://gatech.service-now.com/home?id=kb_article_view&sysparm_article=KB0027561 for information on what will happen to your GT accounts once you have graduated from the OMSCS program. If you have any questions regarding this, please contact OIT directly. Their contact information can be found on their [website](#).

If you have any advising-related questions regarding your graduation, please contact me directly from your GT email account and provide your full name and nine-digit GT ID number (90XXXXXXX), replacing the first two digits with “xx”.

Otherwise, I wish you the very best in your future endeavors!

Sincerely,

Priyal Shah, M.Ed.
